Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 8/24/04.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1 and 10-33 is/are pending in the application.

DETAILED ACTION

This Office Action is in response to the amendment filed August 24, 2004 for the above identified patent application.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1 and 10-33 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The newly added limitation "symmetric teeth" is new matter because the originally filed specification does not appear to describe the teeth as being "symmetric."

Claim Rejections - 35 USC § 102

3. Claims 1, 10-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Young (US Patent 5,997,424).

Young disclose a roller chain sprocket having a plurality of teeth, at least a first flank profile and at least a second flank profile, the second flank profile being different from the first flank profile, wherein the teeth profiles are configured to reduce noise

Art Unit: 3682

when engaging a roller chain. In lines 13+ of column 20, Young disclose the sprocket can have different sets of tooth profiles arranged in many different random or arbitrary patterns.

4. Claims 1, 10-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Young (US Patent 6,090,003).

Young disclose a roller chain sprocket having a plurality of teeth, at least a first flank profile and at least a second flank profile, the second flank profile being different from the first flank profile, wherein the teeth profiles are configured to reduce noise when engaging a roller chain.

Response to Arguments

5. Applicant's arguments filed August 24, 2004 have been fully considered but they are not persuasive. Specifically, The argument that "both the '424 patent and the '003 patent teach away from symmetrical teeth" is not persuasive. It is understood from the Young patent ('424 patent, col. 3, lines 20-22; '003 patent, col. 3, lines 25-27) that it is feasible to produce the disclosed sprocket with symmetrical teeth. Even though the prior art to Young does not recommend using a symmetrical tooth arrangement, the prior art reference clearly teaches the possibility of using a symmetrical tooth arrangement, and therefore the newly added limitation is taught by the prior art reference.

Alternatively, the newly added limitation "symmetrical teeth" is considered new matter because the original disclosure does not appear to describe this feature.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
